

Lab Practical 02 – Project Selection & Supervisor feedback

Each UX team should research and find a Mobile app

Fill the following table to show your findings

Mobile App	Food Ordering & Delivery App
Name:	Machan Eats
Developer	RIBELZ DIGITAL
Purpose:	Food ordering and delivering from Machan restaurants
Screenshot:	<p>Event Planning-</p>

Registration & Login-

	<p>Table Ordering-</p> 
Competitor Mobile apps	Eat MealFirst app, Domino's Pizza, Yamu
Good design	<ol style="list-style-type: none"> 1. Calculations are working as expected. 2. Enable user to register and login using google account. 3. Have not used any fancy fonts which are difficult to read. 4. Can search for food items and restaurants through the app.

Design issues	<ol style="list-style-type: none">1. There is no functionality/ interface for proper registration to the app.2. No proper interface to view shopping cart items. Also, food ordering functionality is not working properly.3. Using a QR code for table ordering is not much practical for a food ordering app. There isn't an interface/ function to book a table using the app.4. No interface or functionality for user to create events.
